Platform 1/Mattermost Account Setup

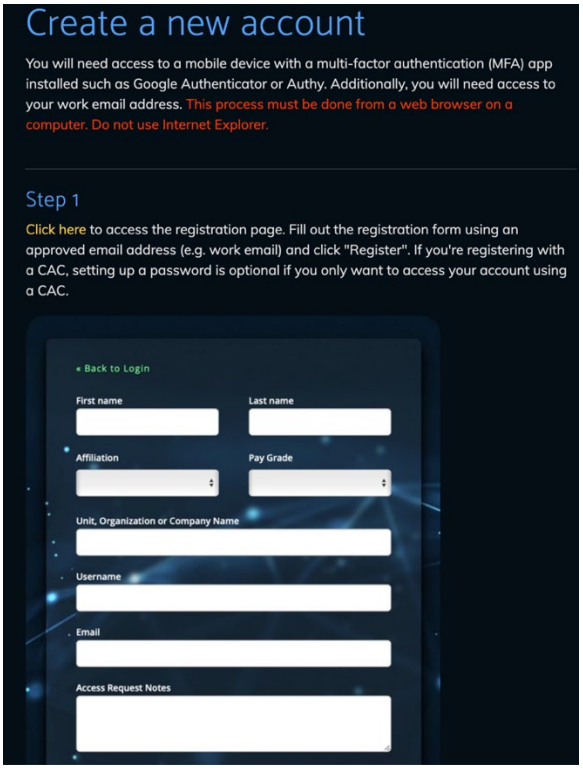

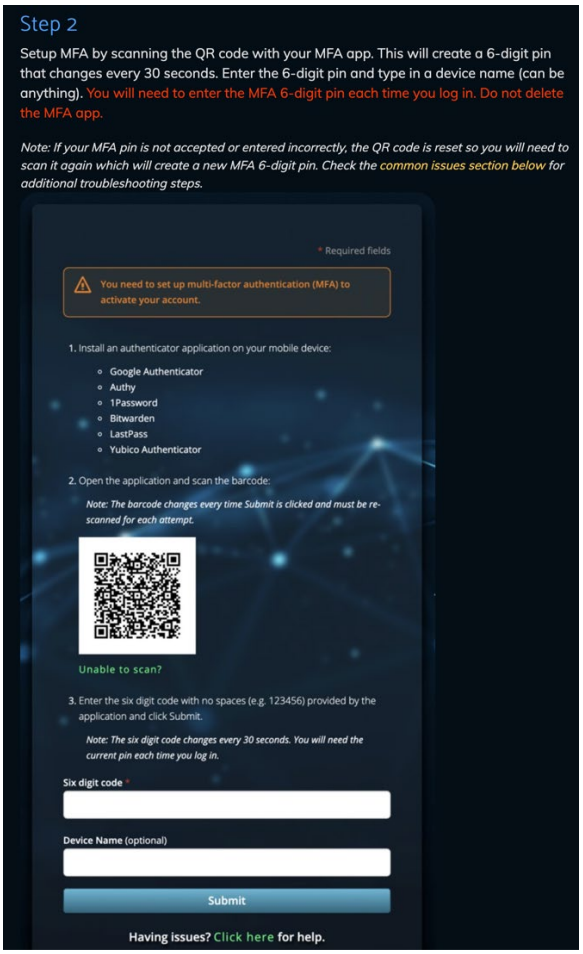

1. Go to https://chat.il4.dso.mil do not use Internet explorer.
2. Select hyperlink “Create one now” to create an account

3. Select GitLab Single Sign-On

4. Use the link at the bottom “No Account? Click here to register now” DO NOT USE YOUR CAC CERT TO LOGIN!!!! Hit cancel and continue, unless you will only ever use it from a CAC reader computer and not a personal device. If you use your CAC to login initially and want to change to a username/password/MFA contact help@dsop.io

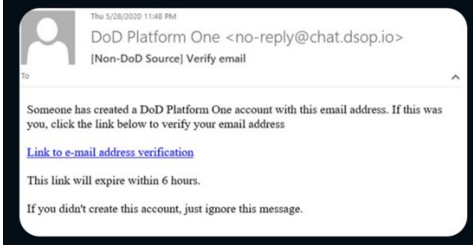

5. Fill in as much info as possible. This makes it easier to search and add you to a team in Mattermost.

Username can be anything but is suggested to be the beginning of your mil email ex: first.last.#
Email must be your mil email and can't be gmail, yahoo, etc.
Password is required to be military type and will ask for reset of password every 120 days.

6. Scan the QR code with an Authenticator app. Suggested to use google authenticator. If you switch phones there is an option to transfer accounts in the app. If you forget or need to reset it go to https://login.dso.mil
   Do not delete this app, you will need the 30 second rotating number in order to login from a personal device (non CAC).
   When logging in on mobile you can copy and paste this code.

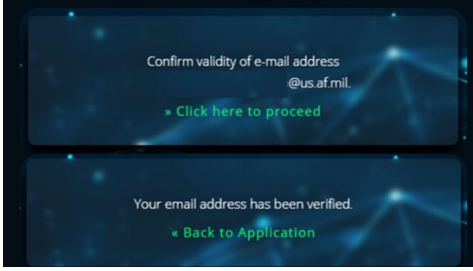

Step 3

You will receive an email with a link to verify your email address. Click “Link to e-mail address verification” or copy the URL into a web browser (do not use Internet Explorer).

Step 4

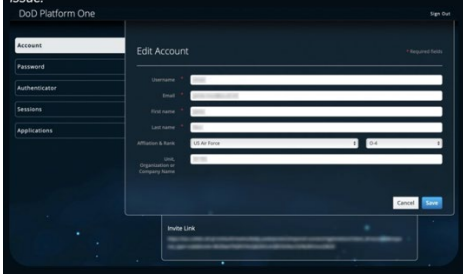

Validate your email address by selecting "Click here to proceed". On the next screen, click "Back to Application".

Step 5

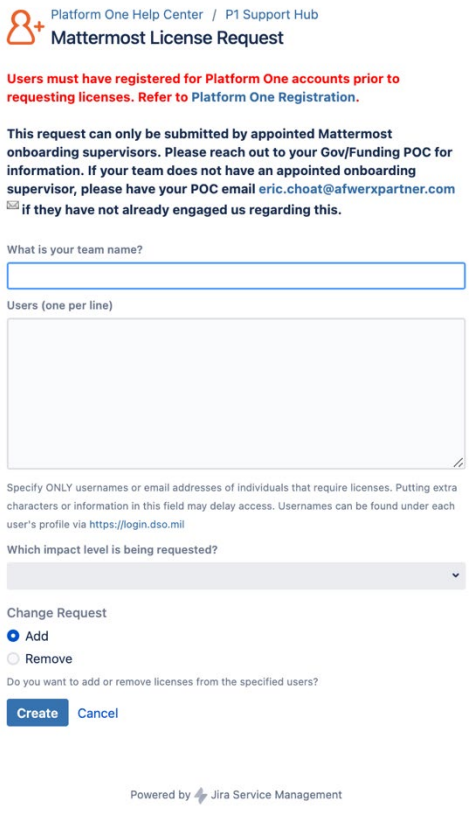

Your account has been successfully created! If desired, you can update the rest of your profile. To access Mattermost (IL4), go to https://chat.il4.dso.mil/, click the blue "Platform One SSO" login button and use the credentials you just created. If you're looking for the IL2 Mattermost instance, access it using http://chat.il2.dso.mil.

Note: For the mobile app, select the purple "GitLab" button to log into P1 SSO. This is a known issue.

7. If you are AMC and receiving the Mattermost message, “You have not been granted access to this application yet,” you will need your Mattermost WG Team POC to validate your account.

You will need to create a P1 account if you don’t already have one, and reach out to your Team Admin to create a help desk ticket for you to be added to the team.

If you are unsure of who your POC is, then reach out to Justin Poole (email: justin.poole.3@us.af.mil or Mattermost: poole.j.21as) to find out.
Once you have gained access to Mattermost, continue with the next steps.

POC List (please update with Eric Choat (eric.choat@afwerxpartner.com) or Justin Poole):

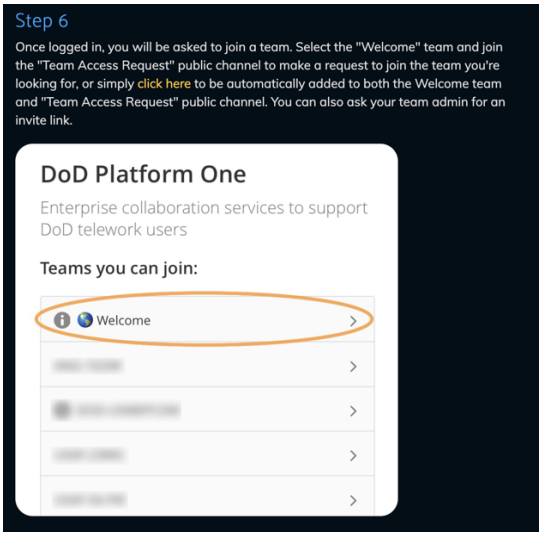

Name	Email	Unit	MAJCOM	Location
Aaron Port	aaron.port.2@us.af.mil	445 AW	AFRC	Wright-Pat

8. Wait for this email before doing anything else. If you don't receive one within 1 business day then email help@dsop.io to let them know. Sometimes the email gets caught up because of email security.

9. Update this screen to add as much info as possible. Use the https://chat.il4.dso.mil to get to Mattermost for military teams. If you're a contractor and working on DoD and innovation projects then https://chat.il2.dso.mil might be what you're looking for. IL4 is for CUI, IL2 is the unclassified version of Mattermost.

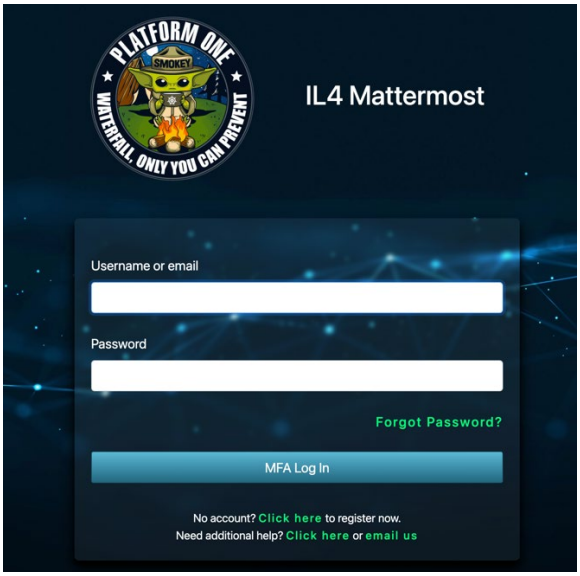

10. Join the Welcome team for any Platform 1 help or issues with Mattermost. The P1 team is there to help and they have links and how to's for Mattermost. If you don't see the Welcome channel at the top of the list then scroll all the way to the bottom of the list then back to the top and it will appear. Once you're in the Welcome Team you can request access to your Wing team.

If you click the Platform One SSO button to log in:

If you currently log into Mattermost using P1 SSO (username/password/MFA), you now have the option to enable the CAC sign in. This allows you to log in using a username/password/MFA or a CAC. To set up CAC login:

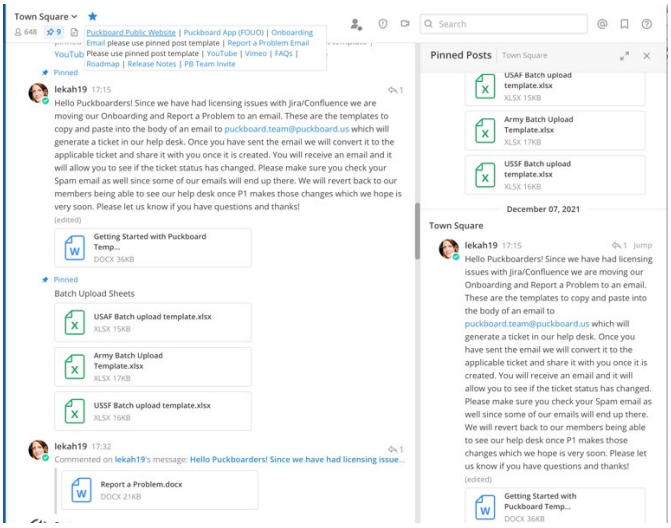

1. Insert CAC into the CAC reader. Ensure the lights stop flashing before continuing.
2. Navigate to https://login.dso.mil.
3. You will be prompted to authenticate with the CAC. The first time you do this, you will receive a message stating a new DoD CAC was detected. Log in using your username, password and MFA at which point you will recieve a prompt to confirm your CAC (pictured below) which will associate it with your P1 SSO account. Now when you sign in from a computer with a CAC, you will simply authenticate using the CAC.

11. In the Welcome Team, Town Square channel type in /requestaccess, and select the command. Add a space, then type team, space, Puckboard then hit enter. You will have a direct message bot letting you know that your request is awaiting approval by a team admin. This will prompt the admin to approve your request and allow access to the Puckboard team. If you want to request access to your Wing team, type /request access team team name
    Only request access to Puckboard team if you're a scheduler, POC for your unit, just need some Puckboard help or are wanting more info.
12. To complete your Platform 1 account setup use a CAC reader computer and go to https://login.dso.mil and select the CAC certificate. This binds your DOD ID# to your P1 account and allows access to Puckboard and many other programs. If your web browser doesn't prompt your CAC, then go to your web browser settings and clear the cache then try again. If it still doesn't prompt then use another browser, any browser except IE.

13. For any help or to see the web page with these screen shots go to https://chat.il4.dso.mil and select the “Need additional help? Click here or email us? link.

Puckboard Onboarding

14. In the Town Square of the Puckboard team on Mattermost there are pinned posts with an onboarding template. In the header of the channel is a link to email the filled out template. This will create a ticket in our help desk so we can track and create your Puckboard page. If you’d like to be added to the demo area for a trial just send a direct message to Leah Schmidt with your DOD ID# and let her know.
