Troubleshooting an empty "Shared With Me" Folder

At some point in January, a number of users have lost access to their folders under "Shared with me" in GoodReader Enterprise. The user will see "Where Did All My Shares Go?" under the "Shared With Me" folder instead. **If you do not see this message, the first step is to update GoodReader Enterprise on Hub**. The following checklist should help resolve the issue:

1. Send this link to yourself via Teams (do not email it to yourself because you cannot copy links from outlook): https://usaf.dps.mil/teams/12679/Aircrew%20Pubs%20Library/Forms/Better.aspx?viewid=8d6a520c%2Dd6ea%2D4afd%2D84bf%2D9b10d78ccd6e
2. Open up the link in Teams on the iPad.
3. Link should open in Safari.
4. Copy the direct link to this folder by clicking the dots next to "Master Library Verified" and selecting "Copy Link"

   -- An alternate method to this is to open the "Master Library Verified Folder" on OneDrive and copying the URL directly from the search bar.
5. Go to GoodReader Enterprise
6. On the bottom, click Connect > Saved Servers > OneDrive/USAF
7. Click on "Shared With Me"
8. Click "Where did all my shares go?"
9. Click "add Share"
10. Paste the URL copied in step 4.
11. Ensure the Master_Library_Verified folder is now populated under "Shared With Me"
12. Download/Sync appropriate folders as necessary.
13. Rinse and repeat with this URL for local folders by clicking "add more shares": https://usaf.dps.mil/teams/12679/ACPL/Local_Folders/Forms/AllItems.aspx
14. Download/Sync "Local_KSUU_C5M", as well as any other folders necessary.

Syncing Individual Folders

Follow these steps if you are missing folders, or need to resync a specific folder for any reason (corrupt, wont sync, etc). The following folders should be installed onto your EFB by default:

1. All Global
2. C5M
3. DTR
4. FCG
5. FLIP
6. Giant Reports
7. C5 INDEX
8. Local_KSUU_C5M

The first step is to delete any sync records (if there are any) of that particular folder by clicking Connect > Sync Records > Delete, then deleting the folder itself from the main page (this prevents duplicate files from being created). Doing this will also delete your notes and bookmarks, unfortunately. The next step is to re-sync the folder from OneDrive. Click Connect > Saved Servers > OneDrive , then sign in if prompted**. If your iPad gets stuck endlessly loading while trying to sign you into OneDrive, click cancel one time and wait until you are prompted to select your certificate.** After selecting your cert, it should log you in without any issues. This is a common issue, and we do not know why it does this.

Next, follow the steps below for any folder you need to sync:

1. Click “Shared With Me”
2. Click “Master_Library_Verified”

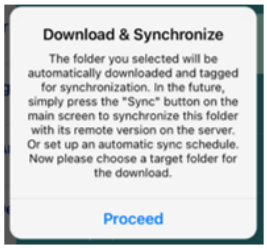

Follow the steps on the next page to sync the individual folders listed above:

1. Choose Needed Folder for Sync, you can only sync one folder at a time

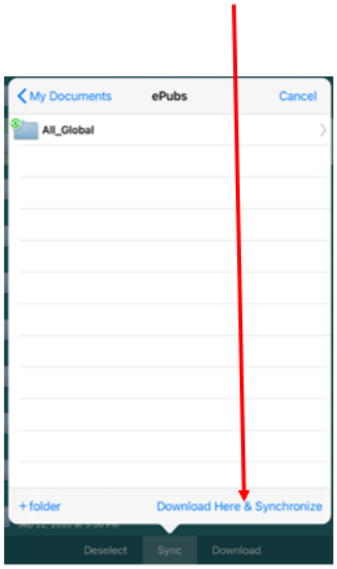

2. Push highlighted “Sync” option

3. Select “Proceed”

4. Choose download location in Goodreader

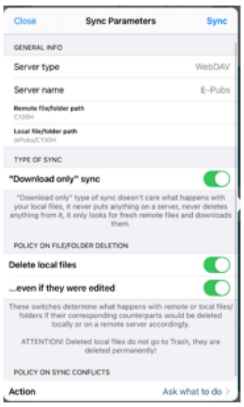

5. Set Parameters:

a. “Download Only sync” – On

b. “Delete local files” – On

c. “... even if they were edited” – On

d. “Action”

Sync Conflicts: “Remote files have priority”

Then click sync. The folder should start syncing to GoodReader.

Other Troubleshooting

Some common troubleshooting tips are also listed below. This comes from the GoodReader Enterprise setup guide.

Issue	Recommended Action
1. When logging into your Air Force Microsoft Account you are presented with a message "You cannot access this resource…"	1. Go to Device Settings > VPN > VPN Configuration > **Turn Off and back On "Connect on Demand"**
2. When logging into your Air Force Microsoft Account you are presented with a message "You cannot access this resource…"	1. Clear **All** Safari History via Settings > Apps > Safari 2. Re-install iOS_VPN_UAG Profile via Hub > Support > Profiles 3. Remove and Reinstall Authenticator
Microsoft applications or Goodreader not presenting me with my account to sign into	Close and quit the app and then try again.
Don't have Master_Library_Verified in my Shared with me folder in GoodReader	1. Follow the first steps on Slide 3. Ensure you click the GoodReader Link on the Sharepoint Site, then wait 2 – 5 mins for GoodReader to see the folder 2. Select the refresh folder icon (bottom left)
@us.af.mil account stuck trying to login to app or site	Click cancel in the top left of the pop up. This sometimes "re-prompts" the website or app to request your cert
Mission Folders not showing up in GoodReader > Shared With Me	Contact your local pubs manager or share the folders as shown in slide 8 if you have access to the shared folders on Sharepoint or Teams

Feel free to reach out to me on mattermost/teams/email if you have further issues or are lost, as a lot of issues are quick fixes but the troubleshooting process can be rather confusing:
